The warranty period of this product is 24 months, counting from the date of product sales. In case of product failure, please contact the dealer. The following operations are not covered by the warranty:

1. human failure or warranty period and unauthorized disassembly and maintenance;
2. Loss or damage caused by force majeure or external reasons;
3. Misuse, accident, negligence, unauthorized modification or repair;
4. Use beyond the limit;
5. Violation of operating regulations.
6. One manual of the packaging accessories, one certificate of approval and two installation screws.

一、matters need attention

The input and output voltages of this product are dangerous, and improper operation will endanger life safety. Please read the manual carefully before operation. Unauthorized professional maintenance personnel, please do not disassemble and assemble without permission. All the consequences caused by the user's illegal operation shall be borne by the user himself and have nothing to do with the company.

Installation environment and precautions:

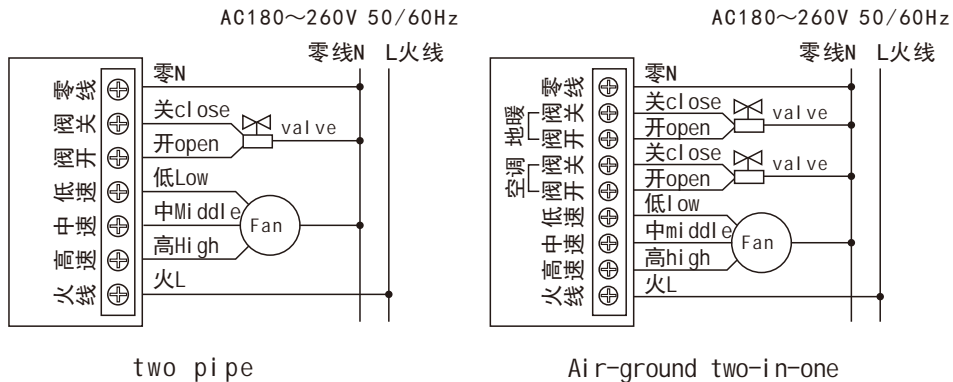

- ◆ Please cut off the power supply during installation.
 - ◆ The installation position should not be too low to avoid heat source;
 - ◆ Connect according to the wiring diagram. If you have any questions, please contact the dealer.
 - ◆ Overload operation is prohibited to avoid damage.
- ⚠: When wiring, do not put impurities such as water and mud into the controller, otherwise the device will be damaged.

二、the performance parameters

Temperature sensor: NTC
 thermostat control accuracy: 1°C
 Temperature setting: 05~35°C
 Display range: 0~50°C
 Working environment: 0~45°C
 Display: LCD
 Humidity: 5~95%RH
 (no condensation)

Power supply voltage: AC 180~260 V, 50/60 Hz
 Power consumption: < 1W
 Load power: 3A<200W, 10A<1000W.
 Terminal: 2*1.5mm or 1*2.5mm conductor.
 Shell: PC+ABS flame retardant
 Overall dimensions: 86*86*17mm (width*height*thickness)
 Installation hole spacing: 60mm (standard)

三、the wiring diagram

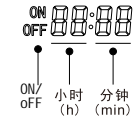

Note: If a normally closed two-wire valve is used on site, just connect the "valve open" terminal; If there is no valve, "valve open" and "valve close" need not be answered.

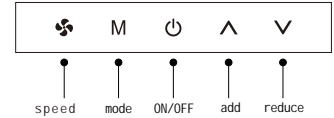

四、the function description

Display status description

Case description
