FLAT PACK CONTAINER

EXTREME COLD

PRODUCT CORE DEFINITION

It is a light steel building unit featuring modular design, factory prefabrication, packaged transportation and rapid on-site assembly. Deeply optimized for extreme environments such as -50℃ severe cold, heavy snow and wind, and frozen soil. Rather than simple container renovation, it provides a customized prefabricated building solution.

ULTIMATE THERMAL INSULATION PERFORMANCE

Multi-layer high-density insulation layers effectively block thermal bridges and adapt to extreme cold climates.

ALL-STEEL ROBUST STRUCTURE

High-strength galvanized steel frame with excellent wind resistance, pressure resistance and seismic performance.

RAPID ON-SITE DEPLOYMENT

Fully factory prefabricated production, only bolt connection required on site, and the whole unit can be completed within hours.

SUPERIOR COMPREHENSIVE COST EFFICIENCY

The construction cycle is shortened by 60%, with overall costs reduced by 35%-40%, delivering remarkable economic benefits.

GREEN ENVIRONMENTAL PROTECTION & RECYCLABILITY

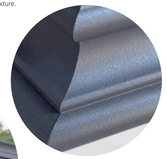

Can be disassembled, assembled and reused for more than 5 cycles, with a high material recovery rate, complying with the concept of sustainable development.

AMERICAN-STYLE PAVILION

The appearance combines American architectural aesthetics design, giving it an elegant and distinctive look, with a textured contour that exudes quality and personality. The functions of rainproof, heat insulation, and pest control meet all outdoor needs.This product is widely used in: villa gardens, terraces, and high-end clubs.

REFINED AND THREE-DIMENSIONAL LINES

Clear, refined, and three-dimensional lines, emphasizing texture.

SURFACE IS SMOOTH AND FREE OF SHARP EDGES

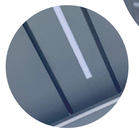

The Roman column shape have a smooth and non-sharp surface, with exquisite details.

ANCIENT ROMAN ARCHITECTURAL STYLE

The style is stately, elegant, and possesses harmony, grandeur, and nobility.

EMBEDDED LED STRIP, WITH WIRES NOT EXPOSED

Integrated control, wires and screws are hidden for a safter and more aesthetically pleasing connection.

SILENT SPACE

ULTIMATE ENJOYMENT

A moveable soundproof room, can be piano room, live broadcast room, reading room and other creative space with acoustic materials, soundproof glass assembled by a reasonable design of noise-proof house.
It is assembled with sheet metal, sound-absorbing board, sound-absorbing cotton, sound-absorbing glass and other sound-absorbing materials.

LIGHTING

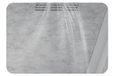

Indoor natural light LED lamp (48W/72W according to the size of the soundproof room) central lighting, suitable for 100V-240V/50-60Hz power supply system to meet the daily power demand

SOUND INSULATION

Using acoustic simulation software, to iterate and obtain optimal performance for internal and external soundproof.
External soundproof design value: Rw+Ctr15dB (+/-5dB and TR0.3s (+/-0.15s), Internal soundproof design value: Rw+Ctr35dB (+/-5dB and TR0.3s (+/-0.15s)

VENTILATION

Low noise ventilation system can the air by exchanging to offer a comfortable inner room.

POWER SUPPLY

The soundproof room is equipped with a 100V-240V/50-60Hz power supply system to meet the daily power demand. The power supply can be increased as required.

SPACE CAPSULE

The Apple cabin series is mid-range product, with a square and regular space design that can be used for accommodation , offce and other purposes with high expandability. The model A1 series is the most cost-effective of all the room models, containing three length-size models of 5.8m , 8.5m and 11.5m , which reduces the width and height of the house, making it possible to ft the house directly into the 40HQ and save on delivery costs.
