BUYING GUIDE 133 **MODEL INDEX** 134

READING GUIDE

Clear references.
Confident selection.

This edition brings together 191 entries from the supplied TAILI catalogue and 49 proposed range extensions. Each entry has a unique reference for discussion and quotation.

CATALOGUE REFERENCE

An existing source catalogue entry, shown with its original image and model code. Published source values are carried forward; fields not stated in the source remain to be confirmed.

DESIGN PROPOSAL

A proposed extension for range development. Dimensions, materials and specifications are targets, subject to engineering and sample approval. Line drawings show the design intent.

MODEL / UNIQUE REFERENCE

The model is the supplier or proposal code. Quote the TL reference as well: it distinguishes entries where a source model code is shared. Codes are not order confirmations.

READING TECHNICAL VALUES

Dimensions use millimetres unless another unit is shown. “TBC” means to be confirmed. Warm white is retained as a colour description where no Kelvin value is supplied. Luminous flux is not stated when measured data is unavailable.

Images and proposed drawings support selection; they are not scale drawings. Confirm the selected product, electrical configuration and applicable documentation before ordering.
