COMMODITY PARAMETERS

Information

MAXIMUM SPECIFICATION	1.2m wide*50m/volume
THICKNESS	2-3mm
ONE SQUARE WEIGHT	2.7kg
PRODUCT MATERIAL	Natural mineral sand, synthesis of water-based materials, green environmental protection

Size

300*100	600*100	1200*100	300*300
150*600	200*600	300*600	600*600
900*600	1200*600	2800*600	3000*600
3000*1200	6000*1200	Geometry	Custom graphics

COMMODITY CHARACTERISTICS

Twelve characteristics of
"Dazhen porcelain" flexible facing brick

	Super flexibility DA ZHEN CJ It can be paved at corners and cylindricalSuch complex modeling	Thin and light Light weight, never falling off,The system is safe and reliable DA ZHEN CJ	
	Good air permeability DA ZHEN CJ Conducive to water vapor balance,Prevent hollowing, freezing and thawing DA ZHEN CJ	Waterproof and impermeable Face and seam can block Infiltration of rain, snow and water DA ZHEN CJ	
	Good weather resistance It can withstand strong winds and rainstorms,High temperature resistance, frost resistance DA ZHEN CJ	Impact resistance With good mechanical strength,Scratch and shock proof DA ZHEN CJ	
	Good fire resistance German flame retardant and fire protection standard Din 4102 Class B1	Stain resistant and self-cleaning Strong stain resistance, wind blown wiperYou can clean yourself as new DA ZHEN CJ	
	Rich color Rich colors can be prepared according to needsThousands of different colors DA ZHEN CJ	Will not fade Non fading iron oxide pigment with strongUV resistance	
	Simple construction Shorten working hours and improve work efficiency, Low comprehensive cost	Green environmental protection Environmental protection, no pollution in production and use,Non toxic and radiation free	

Four characteristics of special adhesive for "Dazhen porcelain"

	Strong adhesion Ensure the bonding between the face brick and the substrate Firm and never fall off	Synthesis of imported materials Can be used directly withoutAdd other additives	
	Easy to use There are no special requirements for the base layer,Brick joint treatment	Green environmental protection Environmental protection, no pollution in production and use,Non toxic and radiation free

Product Name : Textured Sandstone Chips

DA ZHEN CI

Product material : mineral sand and water-based pure elastic composite material

Features :

- ① Anti-mildew, water-proof, color-resistant
- ② Decorative sense: bright and colorful, with texture
- ③ Anti-peeling, anti-defect, reusable
- ④ Easy to install Tile bonding method Easy to install \
- ⑤ Thin material, 3mm thick, can be installed on the curved wall of large tiles

Product label: 36 colors, customers can DIY

Product size: size standard 27, optional specification customization

Product use: The exterior wall and interior wall have a strong three-dimensional effect, and can replace traditional decorative materials such as marble and ceramic tiles.
