The most anticipated configuration

Small grid back Mesh and Automatic Adjustment System

White frame with transparent mesh matches the space well.

In the elegant and refreshing office space, the white nylon frame can be embellishment the space nicely and adapt to various colors. With the help of fully transparent nylon mesh, it restores the space aesthetic and matches the environment.

Rich nylon colors, thin back frame, and strong sense of technology transparent mesh

There are 3 colors of nylon optional for the H chair back frame. When facing the back frame, you can see the dignified and steady back shape of the chair. You can see the thin back frame on the side, which conveys the lightness brought by the high quality raw materials. Matched with the transparent back mesh, the H chair is full of technology and fashion.

The understanding of ergonomics

We try to study the key dimensions of office chairs to fit ergonomics for the compliance and convenience. For shorter users, we designed the shortest seat height and lower handrail height. For tall users, we designed a higher back frame to provide users good back wrapping and support, and we use high specification cylinder rods, as well as a wide range of lifting armrest for support.

*There is a slight error in the measurement size due to the different personnel and methods.

A variety of configurations

As a swivel office chair, we have work chair, executive chair and stool chair. Polished aluminum five-star base, 4D armrest are available.

Every H chair designed a name tag cover, it could stock user name or enterprise information.

Our stool could lift and lock by plastic parts without screw, so it is easy to handle and lock fixed very much.

H chair back mesh, you can choose a fully transparent nylon mesh, or you can choose a translucent elastic mesh. For translucent mesh, there are seven colors available.

Forward tilt as optional. Engage forward tilt to support the thighs' declined posture when performing intensive tasks such as keyboarding.

Every detail of the product is revealed in the ultimate boutique.

The process treatment of the mold, the selection of nylon materials, the design of the product structure, and the attention of each link ensure the perfect presentation of the whole product.

Every design is extremely attentive.

We designed a louver ventilation and heat dissipation hole at the bottom of the seat cover. It is easy to remove the heat gathered in the seat every time you move the body.

The product specification is stored in the storage compartment so that the user manual of the product could be read at any time.

The L-shaped tool will accompany the chair anywhere.

The users can remove, reassemble or disassemble the chair at any time to facilitate relocation and use.

There is no glue and nails inside our seats.

The seat fabric is detachable and easy to clean or replace.

Seat depth adjustment range could be 70mm as standard configuration.

Back Mesh*

High quality nylon mesh makes the transparent back, there are black and white colors.
Half transparent mesh is also available. There are seven mesh colors stocked.

Armrest *

Standard armrest is height adjustable with soft PU cover on the top.
Height adjustment range is 105 mm.

***4D Armrest as optional:**

It allows adjustment in four directions:

Height adjustment range 105 mm;

Side-to-side armcap adjustment range 60 mm: 30mm per arm cap;

Front-to-back adjustment range 50mm;

Pivoting arm caps :20mm in and 20mm out.

Non-wooden Seat

There is a painted steel panel inside the seat to make sure the armrest could be flexed assembly on the seat.

Some holes are designed on the foam cover that is useful for air circulation.

The seat foam is modeled, which is very nice and comfortable for seating.

Synchro Tilting Mechanism*

It is synchronized to deliver greater control for more users. There are two control rods. One is for lifting seat, the other is for back lock.
Standard mechanism has four positions lockable.
