Colorful Chair frame and Elegant curve

There are three colors of nylon available : light grey, snow white and black.

S chair design for comfortable

Through the study of ergonomics and the understanding of mold making and injection molding technology, we design a more fashionable and elegant back shape of the chair, to improve the comfort of the office chair, and to meet the needs of a wide range of users from short to tall.

Nice performance in office space

S chair appearance is protected by Chinese and European Union patent. Its new and unique appearance will be deeply imprinted in the user's heart. It will also become the efficient partner of people's office space since it brings the comfortable experience for the users.

S chair

So elegant that you just want to sit down. S chair back mesh is available with a membrane in white or in black and in many different colors and qualities of our upholstery range for seat.

High quality to ensure the long-term investment

To ensure the appearance of the product gloss and structural strength, we use new nylon reinforced glass fiber injection molding important structural parts to ensure the strength of persistence. S chair got through the United States BIFMA standards by SGS and the strict test item by item in order to provide users with international security for long-term use.

The understanding of ergonomics

We try to study the key dimensions of office chairs to fit ergonomics for the compliance and convenience. For shorter users, we designed the shortest seat height and lower handrail height. For tall users, we designed a higher back frame, give user good back wrapping and support, and we use high specification cylinder rods, as well as a wide range of lifting armrest for support.
Size: 670W*690D*945~1070H

*There is a slight error in the measurement size due to the different personnel and methods.

Forward Tilt 5 degrees.

Engage forward tilt to support the thighs' declined posture when performing intensive tasks such as keyboarding. Forward 5 degrees is very useful for your position.

Back Mesh

High quality small grid mesh made by Wintex from Korea.

Armrest *

Standard armrest is height adjustable, with soft PU cover on the top. Height adjustment range 105 mm.

*4D Armrest as optional;

It allows adjustment in four directions:

Height adjustment range 105 mm;

Side-to-side armcap adjustment range 60 mm: 30mm per arm cap;

Front-to-back adjustment range 50mm;

Pivoting arm caps :20mm in and 20mm out.

Seat Fabric

There are two series Medley and Atlantic collected from Gabriel* with thirteen colors stocked.

Non-wooden Seat

There is a painted steel panel inside the seat to make sure the armrest could be flexed assembly on the seat.

Some holes are designed on the foam cover that is useful for air circulation.

The seat foam is modeled, which is very nice and comfortable for seating.

Cylinder*

We use class-4 cylinder by Korea SAMHONGSA*.

The inside rod is 143 mm black level, which makes sure the seat lifting height over 130 mm.

It is clean cylinder when nylon using grey or white cylinder and adjusted to the high level. It is designed by KGS. The rod is clean without oil and the color kept same as the tube.

Base*

Nylon base radius is 350 mm with two colors: black and grey.

*Polished Aluminum base is optional.

Casters

PA castor's diameter is 65 mm. It has two colors: black and grey.

PA castors diameter is 65 mm. It has two colors: black and grey.

*You should choose 60 mm soft PU castors to protect floor when it is on the wood floor.

Every design is extremely attentive.

We designed a louver ventilation and heat dissipation hole at the bottom of the seat cover, it is easy to remove the heat gathered in the seat every time you move the body. The product specification is stored in the storage compartment, and the use information of the product is read at any time. The L-shaped tool will accompany the chair anywhere, remove, reassemble or disassemble the chair at any time to facilitate relocation and use. There is no glue and nails inside our seats. the seat cloth is detachable and easy to clean or replace.
