

Y Chair[®] by YourSeat[®]

Executive Chair

The staff area design is paying more and more attention in the office space planning, and the management rooms become smaller but more efficient in order to highlight the simplicity and practicality. The executive chair is no longer presented in a heavy form, as the orientation of the executive chair and the staff chair becomes more and more blurred, so the appearance of the executive chair is basically consistent with the choice of the staff.

Y chair design story

The layout of bench desk in office space is more and more popular, people not only work together with colleagues in the opposite side, but also need to communicate and exchange with colleagues behind them. The back frame of the chair is designed with a narrower upper part and a trapezoidal structure, which helps the arm stretch backwards to pick up the object easily. The back support is Y-shaped structure with the multi-line drawing that enhances the stereoscopic feeling and fashion. The Y chair has been protected by the EU registered patent No. 003743970 / 0002, the USA registered patent No. 28148728.29591785 and the Chinese registered patent protection No. 2017 3 0005989.X.

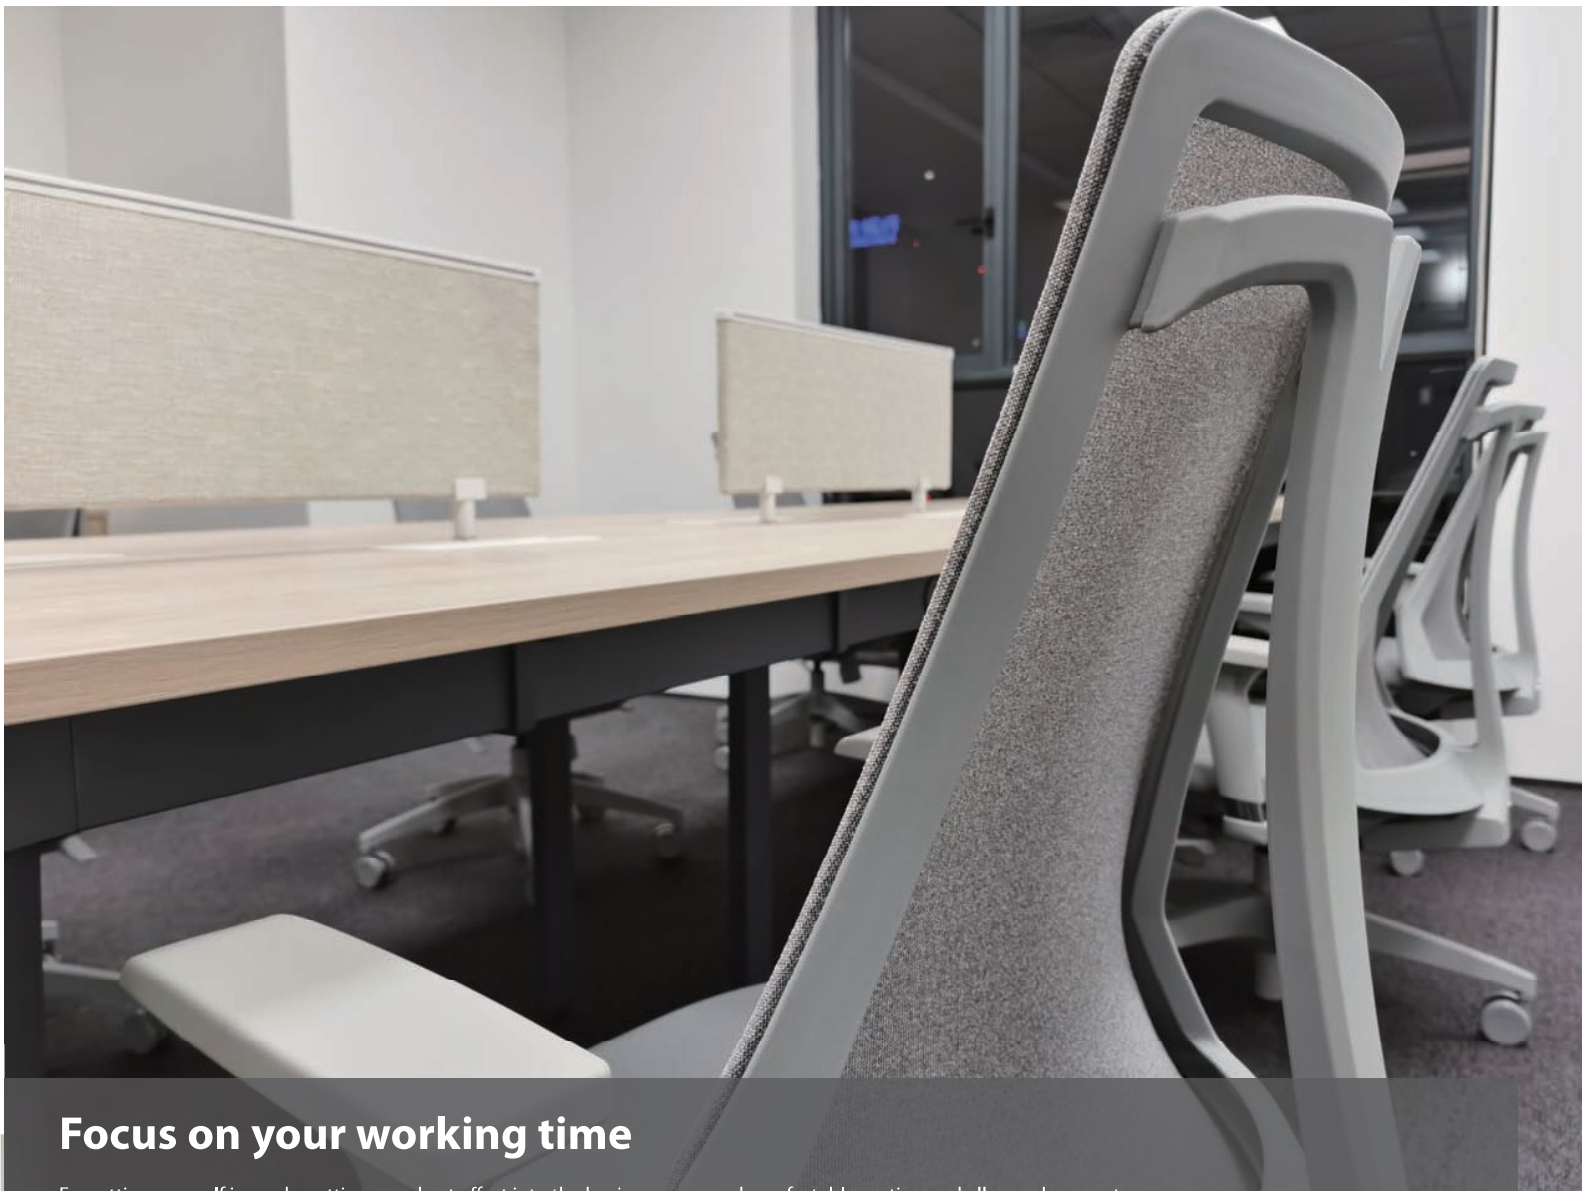

Y chair with grey back frame

The cold-toned office space design helps employees focus on daily business. The soft lighting matched with the gray nylon back frame Y chair with polished aluminum base brings the modest luxury and noble temperament, which helps the investors to improve their productivity and dress up the temperament of the whole office at the same time.

Focus on your working time

Forgetting yourself in work, putting your best effort into the business, we need comfortable seating and all-round support. We made the two sides of the Y chair back frame more lower than common chairs and put it forward to let the back mesh showing a curve shape to face human body. When people sit on it, they always get full support on whole back.

Colorful decoration or furniture

In the decoration process and the use of colors, some industries and fields are bolder decorate. They may paint on the wall with bright color to attract the eyes, or choose the jump color in the furniture so that to make the space looks less monotonous. When using as a moving color, it would be more flexible embellishment for the space.

Meeting Chair

The old conference rooms are mainly arcuate chairs that pursue to be dignified, fixed and neat, but which ignores the main functions of the conference room. People need to be more active and interactive in conference room time. Brainstorming through the collision of thought and benefit by mutual discussion will bring about new changes. Applying staff chairs with five-star base and casters to the conference room will help everyone to become more flexible and easier to communicate with the opposite, left and right, as they move from body to mind.
